

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently amended) A textured article comprising:
a substrate having at least two surfaces; and
raised elements on at least one surface of the substrate, wherein the article is useful for providing skin or hair care benefits; wherein (i) the substrate is selected from the group consisting of a woven fabric, a knit fabric, a nonwoven fabric, a laminate of a fabric and a polymeric film, a flocked fabric, and combinations thereof; (ii) the substrate has a basis weight ranging from about 20 50 grams per square meter to about ~~500~~ 150 grams per square meter; (iii) the discrete raised elements have a diameter ranging from about 0.5 mm to about 3 mm ~~and are in a shape selected from the group consisting of circular dots, hexagons, hearts, diamonds, rectangles, stars and triangles~~; and (iv) the substrate is loaded with a composition selected from a skin care composition and a hair care composition.
2. (Canceled).
3. (Original) The article according to claim 1 wherein the raised elements are formed from hot melt coatings comprising a polymer selected from the group consisting of olefin polymers, block copolymers, and combinations thereof.
4. (Original) The article according to claim 3 wherein the hot melt coating comprises from about 15% to about 100% olefin polymer or a block copolymer, from about 0% to about 60% tackifying resin, and from about 0% to about 50% wax.
5. (Canceled).
6. (Canceled).

7. (Currently amended) The article according to claim 5 ~~4~~ wherein the discrete raised elements cover from about 10 percent to about 90 percent of the surface of at least one side of the substrate.
8. (Canceled).
9. (Currently amended) The article according to claim 6 ~~4~~ wherein the discrete raised elements have a height greater than about 0.01 mm as measured from the surface of the substrate.
10. (Canceled).
11. (Currently amended) A method of providing an exfoliating wipe comprising:
(i) providing a substrate having a basis weight ranging from about 50 grams per square meter to about 150 grams per square meter selected from the group consisting of a woven fabric, a knit fabric, a nonwoven fabric, a laminate of a fabric and a polymeric film, a flocked fabric, and combinations thereof; (ii) pattern coating raised elements having a diameter ranging from about 0.5 mm to about 3 mm ~~in a shape selected from the group consisting of circular dots, hexagons, hearts, diamonds, rectangles, stars and triangles~~ onto the substrate utilizing a hot melt coating selected from the group consisting of olefin polymers, block copolymers, and combinations thereof; and (iv) loading the substrate with a composition selected from a skin care composition and a hair care composition.
12. (Original) The method according to claim 11 wherein the pattern coating is applied by a method selected from hot melt rotary screen coating and hot melt gravure coating.
13. (Original) A method for cleansing the skin or hair comprising topically applying the article of claim 1 to said skin or hair.

14. (Original) The article of claim 1 wherein the article is in the form of a dry or wet wipe.

15. (Original) A method for cleansing, exfoliating or massaging the skin comprising topically applying the article of claim 1 to the skin.

Applicants respectfully submit the above listing of claims is compliant. Reconsideration of the patentability of such claims is requested in light of these amendments and the remarks of the previously filed Reply. Should the Examiner have any questions regarding this submission, please contact the undersigned.

Respectfully submitted,

Brett Freeman
